Information technology	06
Digital literacy	09

Kapow Primary*	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	Hardware						
<section-header></section-header>	 Learning how to operate a camera to take photographs of meaningful creations or moments Learning how to explore and tinker with hardware to develop familiarity and introduce relevant vocabulary Learning how to operate a camera Recognising that a range of technology is used in places such as homes and schools Learning what a keyboard is and how to locate relevant keys Learning what a mouse is and developing basic mouse skills such as moving and clicking 	 Learning how to explore and tinker with hardware to find out how it works Understanding that computers and devices around us use inputs and outputs, identifying some of these Learning where keys are located on the keyboard Learning how to operate a camera 	 Understanding what a computer is and that it's made up of different components Recognising that buttons cause effects and that technology follows instructions Learning how we know that technology is doing what we want it to do via its output. Using greater control when taking photos with tablets or computers Developing confidence with the keyboard and the basics of touch typing 	 Understanding what the different components of a computer do and how they work together Drawing comparisons across different types of computers Learning what a server does 	• Learning about the purpose of routers	 Learning that external devices can be programmed by a separate computer Learning the difference between ROM and RAM Recognising how the size of RAM affects the processing of data Understanding the fetch, decode, execute cycle 	 Learning about the history of computers and how they have evolved over time Using the understanding of historic computers to design a computer of the future Understanding and identifying barcodes, QR codes and RFID Identifying devices and applications that can scan or read barcodes, QR codes and RFID Acknowledging that corruption can happen within data during transfer (for example when downloading, installing, copying and updating files)

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	Networks and dat	a representation					
<section-header></section-header>				 Learning what a network is and its purpose Identifying the key components within a network, including whether they are wired or wireless Recognising links between networks and the internet Learning how data is transferred 	 Consolidating understanding of the key components of a network Understanding that websites & videos are files that are shared from one computer to another Learning about the role of packets Understanding that computer networks provide multiple services, such as the World Wide Web, and opportunities for communication and collaboration 	 Learning the vocabulary associated with data: data and transmit Learning how the data for digital images can be compressed Recognising that computers transfer data in binary and understanding simple binary addition Relating binary signals (Boolean) to the simple character-based language, ASCII Learning that messages can be sent by binary code, reading binary up to 8 characters and carrying out binary calculations Understanding how bit patterns represent images as pixels 	 Understanding that computer networks provide multiple services

Kapow Primary	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science Information technology Digital literacy	Computational the • Using logical reasoning to read simple instructions and predict the outcome		 Articulating what decomposition is Decomposing a game to predict the algorithms used to create it Using decomposition to decompose a story into smaller parts Learning what abstraction is Learning that there are different levels of abstraction Explaining what an algorithm is Following an algorithm Creating a clear and precise algorithm 	 Using decomposition to explain the parts of a laptop computer Using decomposition to explore the code behind an animation Using repetition in programs Understanding that computers follow instructions Using an algorithm to explain the roles of different parts of a computer Using logical reasoning to explain how simple algorithms work Explaining the 	 Solving unplugged problems by decomposing them into smaller parts Using decomposition to understand the purpose of a script of code Using decomposition to help solve problems Identifying patterns through unplugged activities Using past experiences to help solve new problems Using abstraction to identify the important parts when completing 	 Decomposing animations into a series of images Decomposing a program without support Decomposing a story to be able to plan a program to tell a story Predicting how software will work based on previous experience Writing more complex algorithms for a purpose 	 Decomposing a program into an algorithm Using past experiences to help solve new problems Writing increasingly complex algorithms for a purpose
		 Follow a basic set of instructions Assembling instructions into a simple algorithm 	 Learning that computers use algorithms to make predictions Learning that programs execute by following precise instructions Incorporating loops within algorithms 	purpose of an algorithm • Forming algorithms independently	 both plugged and unplugged activities Creating algorithms for a specific purpose 		

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science Information technology Digital literacy	 Programming Following instructions as part of practical activities and games and learning to debug when things go wrong Learning to give simple instructions Learning that an algorithm is a set of instructions to carry out a task, in a specific order Experimenting with programming 	 Programming a Bee-bot/Blue-bot to follow a planned route Learning to debug instructions when things go wrong Developing a how- to video to explain how the Bee-bot/ Blue-bot works. Learning to debug an algorithm in an unplugged scenario 	 Using logical thinking to explore software, predicting, testing and explaining what it does Using an algorithm to write a basic computer program Learning what loops are Incorporating loops to make code more efficient 	 Using logical thinking to explore more complex software; predicting, testing and explaining what it does Incorporating loops to make code more efficient Remixing existing code Using a more systematic approach to debugging code, 	 Understanding that websites can be altered by exploring the code beneath the site Coding a simple game Using abstraction and pattern recognition to modify code Incorporating variables to make code more efficient Remixing existing code 	 Programming an animation Iterating and developing their programming as they work Beginning to use nested loops (loops within loops) Debugging their own code Writing code to create a desired effect Using a range 	 Debugging quickly and effectively to make a program more efficient Remixing existing code to explore a problem Using and adapting nested loops Programming using the language Python Changing a program to personalise it
	 a Bee-bot/Blue- bot and learning how to give simple commands Learning to debug instructions, with the help of an adult, when things go wrong 			justifying what is wrong and how it can be corrected	code • Using a more systematic approach to debugging code, justifying what is wrong and how it can be corrected	 Using a range of programming commands Using repetition within a program Amending code within a live scenario 	 Evaluating code to understand its purpose Predicting code and adapting it to a chosen purpose Altering a website's code to create changes

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	Using software						
Information technology Digital literacy	• Using a simple online paint tool to create digital art	 Using a basic range of tools within graphic editing software Taking and editing photographs Understanding how to create digital art using an online paint tool Developing control of the mouse through dragging, clicking and resizing of images to create different effects Developing understanding of different software tools 	 Developing word processing skills, including altering text, copying and pasting and using keyboard shortcuts Using word processing software to type and reformat text Using software to create story animations Creating and labelling images 	 Taking photographs and recording video to tell a story. Using software to edit and enhance their video adding music, sounds and text on screen with transitions 	 Building a web page and creating content for it Designing and creating a webpage for a given purpose Use Google online software for documents, presentations, forms and spreadsheets. Work collaboratively with others 	 Using logical thinking to explore software more independently, making predictions based on their previous experience Using software programme Sonic Pi to create music Using the video editing software: to animate Identify ways to improve and edit programs, videos, images etc. Independently learning how to use 3D design software package TinkerCAD 	 Using logical thinking to explore software independently, iterating ideas and testing continuously Using search and word processing skills to create a presentation Planning, recording and editing a radio play Creating and editing sound recordings for a specific purpose Creating and editing videos, adding multiple elements: music, voiceover, sound, text and transitions to create a video advert Using design software TinkerCAD to design a product Creating a website with embedded links and multiple pages

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	Using email and th	e internet					
Information technology Digital literacy	• Participating in group image searches, led by the teacher	 Searching and downloading images from the internet safely 		 Learning to log in and out of an email account Writing an email including a subject, 'to' and 'from' Sending an email with an attachment Replying to an email 		 Developing searching skills to help find relevant information on the internet Learning how to use search engines effectively to find information, focussing on keyword searches and evaluating search returns 	• Understanding how search engines work
	Using data						
	 Representing data through sorting and categorising objects in unplugged scenarios Representing data through pictograms Exploring branch databases through physical games 	 Introduction to spreadsheets Representing data in tables, charts and pictograms Sorting data and creating branching databases Identifying where digital content can have advantages over paper when storing and manipulating data 	 Collecting and inputting data into a spreadsheet Interpreting data 	 Understanding the vocabulary associated with databases: field, record, data Learning about the pros and cons of digital versus paper databases Sorting and filtering databases to easily retrieve information Creating and interpreting charts and graphs to understand data 	• Designing a weather station which gathers and records sensor data	• Understanding how data is collected	 Understanding how barcodes, QR codes and RFID work Gathering and analysing data in real time Creating formulas and sorting data within spreadsheets

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	Wider use of tech	nology					
Information technology		 Recognising common uses of information technology, 	• Learning how computers are used in the wider world	 Understanding the purpose of emails. 	• Understanding that software can be used collaboratively	• Learning what a search engine is	• Learning about the Internet of Things and how it has led to 'big data'.
Digital literacy	technology, including beyond school • Recognising uses of technology beyond school			online to work as a team		• Learning how 'big data' can be used to solve a problem or improve efficiency	

Kapow Primary"	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science Information technology Digital literacy	 Recognising that a range of technology is used in places such as homes and schools Learning to log in and log out When using the internet alongside an adult, or independently, learning what to do if they come across something that worries them or makes them feel uncomfortable 	 Logging in and out and saving work on their own account Understand the importance of a password When using the internet to search for images, learning what to do if they come across something online that worries them or makes them feel uncomfortable 	• Understanding how to stay safe when talking to people online. Not sharing personal information and what to do if they see or hear something online that makes them feel upset or uncomfortable	 Learning to be a responsible digital citizen; understanding their responsibilities to treat others respectfully and recognising when digital behaviour is unkind Learning about cyberbullying Learning that not all emails are genuine, recognising when an email might be fake and what to do about it 	 Recognising what appropriate behaviour is when collaborating with others online Recognising that information on the Internet might not be true or correct and that some sources are more trustworthy than others 	 Identifying possible dangers online and learning how to stay safe. Creating an animation about digital safety Recognising that information on the Internet might not be true or correct and learning ways of checking validity Learning to use an online community safely 	 Understanding the importance of secure passwords and how to create them Using search engines safely and effectively Recognising that updated software can help to prevent data corruption and hacking
